

### Saving money from overfills, rework and more

**Customer:**

**Oregon Freeze Dry** is the world's largest custom processor of freeze-dried products.

**Challenges:**

- Eliminate reworks within the Food Division
- Maintain consistent label weights and net content measures
- Automate data entry with Ohaus® electronic scales
- Centrally manage product data for customer audits, traceability and process improvement
- Maintain supplier data for incoming raw materials
- Accurately communicate process capability to customers

**Solution:**

Zontec's Synergy 2000™ Enterprise-wide SPC Software on all packaging lines and in the Quality Assurance Lab

**Results:**

- Avoiding manual data entry
- Receiving real-time process alarms
- Cost savings by reducing amount of rework
- Reducing product giveaway from overfills
- Commercializing new products faster with minimal packaging issues
- Improving job satisfaction for Packaging Operators

*"It's a very user friendly piece of technology. Within minutes, Operators feel comfortable using it."*

**—Tim Stutzman, Manufacturing Systems Analyst**
