

tion conditions. (For further information about Synergy 3000 Web Applications, please reference Zontec's Web Operator and Web Manager Product Data Sheets).

To connect the iPad with the Synergy 3000 Web applications, companies must have implemented the Synergy 3000 software in both the Windows environment and on a Web server. Depending on the iPad model chosen, users access Synergy 3000 via Wi-Fi or 3G networks.\*

The compatibility between Synergy 3000 and the iPad confirms Zontec's commitment to bring the latest mobile computing solutions to the SPC software user community.

\*Synergy 3000 support on the iPad is limited solely to the SPC application itself. Zontec does not sell the iPad or assume responsibility for the device setup, activation of AT&T and other iPad 3G wireless voice and data services, or Internet connectivity issues.

The screenshot displays the 'Synergy 3000 Web Manager' interface. It features a 'Select a Data Master' dropdown menu, 'Update', 'Quit', and 'Logout' buttons. Below is a 'Management Report' table with columns for 'Log Report Message', 'Data Bank Name', and a grid of colored status indicators. A 'Select Report Type' menu is open, listing options: 'Monthly Summary', 'Summary By IDs, Date/Time,...', 'Monthly Reject', and 'Reject By IDs, Date/Time, Sa...'. The interface also shows a browser address bar and a Google search bar.

The screenshot shows a 'Certificate of Analysis Report (AirAware 22001)'. It includes a header with company and customer information, a description of the parts, and a table of characteristics with statistical data.

Data Bank Name	Characteristic	USL	NOM	LSL	Cp	Cpk
AirAware 22001	22001 Height	2.5	2	1.5	1.397	0.919
	22001 ID	3	2.25	1.5	1.32	0.98
	22001 Length	2.5	2	1.5	0.96	0.84
	22001 OD	3	2	1	1.76	1.62
	Visual Inspection
