

Web-based Learning Series

Using your company's Internet connection and phone system, you can join a Zontec Education Specialist for basic and practical introductory instruction on the various features and functions of our Synergy software programs.

The following is a list of available course offerings. You may also combine various components from any of the topics listed into a customized 30-45 minute session of your choosing.

To inquire about availability and pricing, please use one of the contact methods listed at the bottom of this document.

Topic WT01A:

Creating Data Banks/Data Tables/Data Master Files

Who should attend?

Engineer and Manager-Level Synergy users responsible for the setup and modification of data files.

How will I benefit?

You'll walk away with a basic knowledge of how to create Data Banks/ Data Tables and Data Master files. In addition, you'll understand the overall file structure and hierarchy.

Topic WT02A:

Define Screen Capabilities

Who should attend?

Engineer-Level Synergy users responsible for defining the text, graphics, reference documents, work instructions or videos displayed for Operators and other Quality individuals using the application.

How will I benefit?

You'll walk away with a basic knowledge of some of the "Define Screen" functionality available in the Synergy application. Customizing the look and feel of your screen ensures productivity and better understanding of the program by your Operators.

Topic WT03A:

Charting Capabilities

Who should attend?

All three levels of Synergy users who wish to gain a better understanding of all of the available charts within the application and how to access them..

How will I benefit?

You'll walk away with a basic knowledge of some of the charting capabilities within the Synergy application. You'll then be able to graphically display, interpret and share your SPC data in real time.

Topic WT04A:

Reporting Capabilities

Who should attend?

All three levels of Synergy users who wish to gain a better understanding of some of the available reports throughout the application and how to access them.

How will I benefit?

You'll walk away with a basic knowledge of some of the reporting capabilities throughout the Synergy application. You'll then be able to maximize your SPC data collection results for both customer-requirements and internal analyses.
